What is a 10440 lithium ion battery?

High-Capacity Design: 10440 lithium-ion batteries, each with 350mAh capacity, in a compact AAA-sized form factor (10mm x 44mm) but with a higher 3.7V output. **High-Voltage Compatibility:** These 3.7V batteries are specifically for devices that require high-voltage 10440 cells and are not compatible with standard AAA devices.

What is the difference between protected & unprotected 10440 lithium batteries?

Protected 10440 lithium batteries include a built-in circuit board that prevents overcharging, over-discharging, and short-circuiting. These are ideal for beginners or anyone using them in sensitive or expensive devices. Unprotected 10440 batteries, on the other hand, lack this safety layer.

Is a 10440 a good battery?

Despite its small size, the 10440 lithium battery packs an impressive punch when it comes to capacity. Most high-quality models offer between 300mAh and 600mAh of energy. That's lower than the capacity of AA or even some AAA batteries, but the tradeoff is a much higher energy-to-size ratio and voltage.

Top Recommendation: Lankoo 10440 Lithium Battery 3.7V 750mWh 4-Pack with Type-C. **Why We Recommend It:** This battery excels with its long lifecycle of over 1200 ...

New: A brand-new, unused, unopened, undamaged item in its original packaging (where packaging is applicable). Packaging should be ...

The most highly rated 10440 lithium batteries include the Keppower 10440 Li-ion Battery, the Efest 10440 Battery, and the Olight 10440 Rechargeable Battery, according to ...

Get the 10440 350mAh Li-ion Rechargeable Batteries at eblofficial
