What is a solar inverter?

This inverter is a versatile inverter that combines the functions of an inverter, solar charger, and battery charger, providing uninterrupted power support in a portable size.

What are the different types of solar inverters?

Three-phase: developed for higher yield and more suitable for commercial environments. Hybrid inverters: have the option to draw power from the grid or your energy storage system. Hybrid inverters are great during power blackouts. There are several finance options to help with your move to solar, including 0-1% bank loans. Learn more.

How do solar inverters work?

Inverters seamlessly integrate with your solar system, providing stable and consistent power for your home or business. They help deliver innovative energy management for more significant savings and energy independence.

Why should you choose trade depot solar inverters?

Maximise your solar energy with high-performance inverters from Trade Depot. Convert and manage power efficiently for a dependable energy solution - NZ Wide Delivery

Deye SUN-5K-SG04LP3-AU 5kW Three Phase 2 MPPT Hybrid Inverter LV Battery Support

A multi functional inverter, combining functions of smart inverter, solar charger and battery charger, and with portable size. Support remote assist and upgrade by OTA.

****10-Year Warranty**** SUN-5K-SG04LP1-AU | 5kW | Single Phase | 2 MPPT | Hybrid Inverter | LV Battery Supported Higher yields / Safe & Reliable / Smart / User-friendly Colorful touch LCD, ...
