-----

In August 2025, the first CO<sub>2</sub> volumes were injected and successfully stored in the reservoir. The world's first third party CO<sub>2</sub> transport and storage facility is now in operation, contributing to ...

The full-scale project includes capturing CO<sub>2</sub> from industrial sources and shipping liquid CO<sub>2</sub> to the terminal in &#216;y garden, near Bergen, Norway. From there, the liquified CO<sub>2</sub> ...

The Northern Lights facility in the Barents Sea, off the coast of Bergen, is now ready to start receiving shipments of 1.5 million tonnes per year of liquefied carbon dioxide via ...

The full-scale project includes capturing CO<sub>2</sub> from ...

Norway-based carbon capture, transport, and storage (CCS) initiative Northern Lights has announced that it will start its first CO<sub>2</sub> storage operations in early 2025.

Installed off Bergen, the system consists of vast hollow spheres anchored 400 metres below the surface. When surplus wind power is available, electricity pumps water out ...

Kate Moran, president and CEO of Ocean Networks Canada, an oceans research observatory, is working on a project exploring carbon ...

Norway-based carbon capture, transport, and storage (CCS) initiative Northern Lights has announced that it will start its first CO<sub>2</sub> ...

Kate Moran, president and CEO of Ocean Networks Canada, an oceans research observatory, is working on a project exploring carbon storage in basalt rock below the seabed.

The Northern Lights CO<sub>2</sub> transport and storage facility, in Øygarden, near Bergen, Norway, was officially opened on 26 September. It is a joint venture between Equinor, Shell ...

The project is said to reflect the Norwegian government's ambition to develop a full-scale CCS value chain in Norway, ...

The Northern Lights CO<sub>2</sub> transport and storage facility, in Øygarden, near Bergen, Norway, was officially opened on 26 September. ...

The project is said to reflect the Norwegian government's ambition to develop a full-scale CCS value chain in Norway, demonstrating the potential of this decarbonization ...

Tanks that hold thousands of tons of liquid carbon dioxide extracted from the exhaust produced by a cement plant in Øygarden, near the port city of Bergen, Norway, June ...

The Northern Lights consortium, which runs the site, announced Monday that the first-ever CO<sub>2</sub> injection into the North Sea seabed has been completed by the world's first ...

The Northern Lights consortium, which runs the site, announced Monday that the first-ever CO<sub>2</sub> injection into the North Sea ...
