Where does Botswana get its power?

In 2023, BPC agreed to procure up to 600 MW of power generation from a yet-to-be-built coal-fired power station. Additionally, Botswana imports the bulk of its power from South African utility Eskom, and the rest from Nampower (Namibia), Zesco (Zambia), and the Southern African Power Pool (SAPP), to make up for any production shortfalls.

Does Botswana have electricity?

It was established in 1970 and is currently the only electricity supplier in the country. BPC represents Botswana in the Southern African Power Pool. Morupule Power Station (coal-fired) in Palapye supplies 80% of domestically generated electricity, however the country is dependent on importing energy from its neighbours.

What is the power sector in Botswana?

Revised in April 2025, this map provides a detailed view of the power sector in Botswana. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, gas and liquid fuels, coal, hybrid, hydroelectricity and solar.

What is Botswana Power Corporation (BPC)?

Botswana Power Corporation (BPC) is a state-owned entity created by Act of Parliament in 1970. BPC is responsible for generating, transmitting and distributing electricity within the country to areas approved by the Ministry of Minerals, Green Technology and Energy Resources.

Botswana Power Corporation (BPC) is a state-owned company for electrical power generation, transmission and distribution in Botswana. It was established in 1970 and is currently the only electricity supplier in the country. BPC represents Botswana in the Southern African Power Pool. Morupule Power Station (coal-fired) in Palapye supplies 80% of domestically generated electricity, however the country is dependent on importing
