---

While your smartphone battery dies by lunchtime, Northern Cyprus is deploying storage solutions that last. Take the Lefkosa MegaBank project--a 20MW lithium-ion system ...

The project would combine 72MW of solar PV with a 41MW/82MWh lithium-ion battery energy storage system (BESS), making it the largest to-date of either technology type. It would be ...

Cyprus" Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy ...

Construction of large-scale energy storage project in Cyprus will begin accepting applications from commercial producers to construct energy storage facilities on the island in January, Energy ...

Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by the University ...

Cyprus" Department of Environment has approved a project for what is set to become one of the country's first battery energy storage ...

In an ambitious move towards a sustainable energy future, Cyprus is set to operationalize its first large-scale electricity storage system within the next 16 months.

Cyprus is poised to introduce large-scale renewable energy storage solutions by 2026, a move aimed at addressing the nation's ...

The planned battery storage infrastructure, to be installed between 2026 and 2030, will have a total capacity of
