---

Small modular reactors are reshaping nuclear power with their compact design and potential, and other top energy stories from IEEE Spectrum in 2025.

Deployment: Projects that deploy residential, commercial, and utility scale energy storage systems for a variety of clean energy and clean transportation end uses.

Utility scale battery storage capacity surpassed 26 GW in 2024 and continues to grow strongly, with BESS now forming a significant share of interconnection queues. Our new briefing, Future ...

In another record-breaking year for energy storage installations, the sector has firmly cemented its position in the global electricity market and reached new heights. From ...

Explore the Future of energy storage--discover key technologies, market trends, and innovations powering the clean-energy transition.

Discover the Top 10 Energy Storage Trends plus 20 out of 3400+ startups in the field and learn how they impact your business.

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

The developments in California, Hawaii, and Texas underscore a nationwide push for long-duration energy storage (LDES) solutions that are essential for integrating renewable ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more comprehensive assessments and descriptions of ...

The Energy Storage Roadmap was reviewed and updated in 2022 to refine the envisioned future states and provide more ...

Explore the Future of energy storage--discover key technologies, market trends, and innovations powering the clean-energy ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging ...

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity ...
