---

Helen is building a green hydrogen production facility in Vuosaari, Helsinki. This is Helen's first hydrogen project, which enables the company to create the necessary expertise ...

The goal is to begin hydrogen production at the new Vuosaari plant in 2026 and open an adjacent hydrogen filling station in 2027. The hydrogen ...

Finnish energy company Helen has selected Sweco as EPCM partner in the implementation of its first production plant for green ...

We are building a green hydrogen production plant in Vuosaari, Helsinki. This is Helen's first hydrogen project with which we will increase our expertise to meet the needs of large-scale ...

The goal is to begin hydrogen production at the new Vuosaari plant in 2026 and open an adjacent hydrogen filling station in 2027. The hydrogen produced will primarily serve heavy transport ...

Read how companies developing hydrogen-powered transport solutions can grow with Helsinki Hydrogen Hub and the world's ...

Read how companies developing hydrogen-powered transport solutions can grow with Helsinki Hydrogen Hub and the world's first fully integrated green hydrogen plant.

The plant, part of the 3H2 - Helsinki Hydrogen Hub pilot project, will have a capacity of approximately three MW. The hydrogen produced will primarily serve heavy transport ...

Finnish energy company Helen has chosen Sweco as its EPCM partner to implement its first green hydrogen

production plant. Set to begin hydrogen production in 2026, ...

It is also possible to deliver hydrogen to customers in containers. In the 3H2 plant, hydrogen will be produced with renewable electricity, which means that the production is emission-free.

The pilot plant, named the Helsinki Hydrogen Hub (3H2), boasts a capacity of approximately three megawatts. The hydrogen produced will primarily fuel a hydrogen station ...

This pioneering project, known as the Helsinki Hydrogen Hub (3H2), aims to generate three megawatts of green hydrogen, primarily to ...

Finnish energy company Helen has selected Sweco as EPCM partner in the implementation of its first production plant for green hydrogen. Production of hydrogen is set to ...

This pioneering project, known as the Helsinki Hydrogen Hub (3H2), aims to generate three megawatts of green hydrogen, primarily to fuel a new hydrogen refueling ...

Helen is building a green hydrogen production facility in Vuosaari, Helsinki. This is Helen's first hydrogen project, which enables ...

The pilot plant, named the Helsinki Hydrogen Hub (3H2), boasts a capacity of approximately three megawatts. The hydrogen ...
