Which isolator switches are available in different ranges?

Because, these isolator switches are available in a variety of ranges. You can get isolation switch that have Sparkelec 1/2 Pole 35amp Isolator Switch IP66, Sparkelec 3 Pole 35amp Isolator Switch IP66, or Sparkelec 4 Pole 63amp Isolator Switch IP66, or you can get an isolator that has three phases.

What is the difference between miniature circuit breakers & isolators?

Miniature circuit breakers (MCBs) provide dependable overcurrent protection, while isolators ensure safe circuit disconnection. Available in UL-certified and non-UL variants to meet diverse regulatory requirements. Have a question or request? Be the first to hear about new product announcements, our latest blog posts and much more.

How does an isolator switch work?

An isolator switch operates by disconnecting a portion of an electrical circuit from the main power source, ensuring that maintenance and repairs can be carried out safely. When the isolator switch is in the "off" position, it creates an open circuit, preventing the flow of electricity to the isolated section.

Does nhp offer an enclosed isolator?

NHP offer various enclosure options for indoor and outdoor applications, with current ratings up to 800A as standard (higher available as custom), making it easy to find the right enclosed isolator for your operating conditions.

Isolator switches are widely used in renewable energy systems, business and industrial buildings, and residential locations, and you can buy them from us at market-competitive pricing.

Discover high-quality isolator switches for safe circuit disconnection. Explore UL and non-UL options with versatile mounting and high short-circuit capacity.
