Is Astana a good place to install solar panels?

Astana, now known as Nur-Sultan, is located in the northern part of Kazakhstan. The topography around the city is predominantly flat and steppe-like with a few small hills. This region experiences a continental climate with cold winters and hot summers. The flatness of the terrain would make it suitable for solar PV installation.

How much do solar panels cost?

Solar panels cost between \$0.30 and \$0.90 per watt without labor and other fees. Since your typical solar panel system size is 6.5 kW, anticipate spending around \$3,900 for the panels alone, or somewhere between \$1,950 and \$5,900. However, system sizes range from 3 kW to 11 kW, so you could see prices for as little as \$900 or as much as \$8,800.

Are there incentives for businesses to install solar energy in Kazakhstan?

Yes, there are incentives for businesses wanting to install solar energy in Kazakhstan. The government of Kazakhstan has implemented a number of policies and programs to promote the use of renewable energy sources, including solar energy. These include tax exemptions, grants, and subsidies for businesses that install solar systems.

How much solar power does Kazakhstan produce a year?

Seasonal solar PV output for Latitude: 51.1876, Longitude: 71.4491 (Astana, Kazakhstan), based on our analysis of 8760 hourly intervals of solar and meteorological data (one whole year) retrieved for that set of coordinates/location from NASA POWER (The Prediction of Worldwide Energy Resources) API: Average 6.59 kWh/day in Summer.

In summer, you can expect to generate about 6.59 kilowatt-hours (kWh) per day for each kilowatt (kW) of your installed solar power system; in ...
