How much does a home battery system cost?

When installing a home battery system, the installation costs typically range from \$1,500 to \$3,500, depending on your location and system complexity. This includes labor, electrical work, and mounting hardware. A certified electrician will need to install a transfer switch, update your electrical panel, and ensure proper system integration.

How much does home battery storage cost?

The cost of home battery storage has plummeted from over \$1,000 per kilowatt-hour (kWh) a decade ago to around \$200-400/kWh today, making residential energy storage increasingly accessible to homeowners.

How much energy can a battery store?

A good rule of thumb is to choose a battery system that can store enough energy to power your essential appliances for 24 hours. For most households, this typically ranges between 10-15 kWh of storage capacity. However, your specific needs may vary based on several factors: First, consider your average daily energy usage.

How much does it cost to install a battery?

We'll explore these factors later. On average, it costs around \$1,300 per kWh to install a battery before incentives. With the 30% federal tax credit applied, the cost is closer to \$1,000 per kWh. Update: This tax is only available to home battery storage systems installed by December 31, 2025.
