Can Thailand use energy storage?

Although Thailand is a regional leader in renewable energy, its use of energy storage is nascent. EGAT undertook some studies on the potential for energy storage and is piloting three battery energy storage installations. One is located alongside a solar project in Mae Hong Son Province to improve power supply stability.

When does electricity demand peak in Thailand?

Source: Energy Regulatory Commission. 2012. Thailand: Energy Regulation and the Promotion of Energy Conservation. Bangkok. Electricity demand in Thailand has predictable seasonal and daily cycles. Annual peak demand is generally from March to May, during periods of high temperature.

Who buys electricity in Thailand?

It is the principal purchaser of electricity in Thailand and sells all the power it generates or purchases (from private power producers and neighboring countries) to two state-owned enterprises: the Metropolitan Electricity Authority (MEA) and the Provincial Electricity Authority (PEA).

Does Thailand offer private sector participation in renewable electricity generation?

The Government of Thailand has opened access for private sector participation in the renewable electricity generation business through its programs for small and very small power producers.

The Finance Ministry of Thailand is set to propose a new battery tax structure to the cabinet in February, introducing a tiered rate system to replace the current flat tax rate of ...

The Energy Policy Administration Act of 2024 introduced feed-in tariffs for hybrid systems, granting up to 8% tax rebates for industrial users deploying ≥ 500 kWh storage.
