What is a solarcontainer?

Solarcontainer explained: What are mobile solar systems? The Solarcontainer represents a grid-independent solution as a mobile solar plant. Especially in remote areas it can guarantee a stable energy supply or support or almost replace a public grid with strong power fluctuations, as well as diesel generators that are used.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction,our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms,vandalism,and all kinds of possible threats. Mobile solar containers application visuals.

Where can a solar container be used?

Possible locations are therefore remote villages, development and crisis areas, mining, venues or deployments in extreme weather events. In order to be able to use the high PV output when there is limited sun exposure, the solar container can also be used in combination with an energy storage device.

Why should you choose solarcontainer?

The traceabilityof all Solarcontainer components can be guaranteed at all times. Spare parts are kept in stock and can be delivered quickly if required. The areas of application and use cases are wide-ranging. This results in very general use cases such as:
