What does Nordic batteries do?

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid systems. At Nordic Batteries we focus on what is important: safety, reliability and performance.

How is digitalisation transforming the Nordic power sector?

Digitalisation is transforming the Nordic power sector, enabling smarter, more efficient, and more resilient energy systems. Advanced digital tools are being deployed across the value chain, from generation and grid operations to market platforms and customer interfaces, enhancing transparency, automation, and responsiveness.

What are the emerging technologies in the Nordics?

Here are some of the emerging technologies in this transformation: Battery energy storage solutions (BESS) are expanding across the Nordics, starting from a low base, supported by significant price reductions in recent years. (See news of the first larger BESS debt financing in the Nordics.)

Are Nordic batteries looking for a development engineer?

Nordic Batteries are seeking a development engineer for mechanical construction and system design. Factor 47 is operative! The pilot line where Nordic Batteries will produce their first battery modules is now officially open after the visit from former Prime Minister Erna Solberg where she cut the banner to kick it off.

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including ...

This article delves into the top 10 energy storage companies in Sweden, which include key developers and investors who are delivering ...

At HST Nordic, we engineer, procure, and construct high-impact renewable energy and industrial projects across Sweden and beyond. As part of a globally recognized industrial group, we ...

Nordphase specializes in battery energy storage systems, providing consultancy and training to promote renewable energy in Nordic and Eastern European markets. Partner with us for ...

At HST Nordic, we engineer, procure, and construct high-impact renewable energy and industrial projects across Sweden and beyond. As part of a ...

Explore the top energy storage investors in the Nordics, featuring names like Equinor and EQT Group, shaping the future of energy.

Discover the top emerging companies in the Energy Storage Startups in Nordics, their funding activity, key investors, company highlights, and growth stages

This article delves into the top 10 energy storage companies in Sweden, which include key developers and investors who are delivering innovative solutions. This dynamic ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, efficient and sustainable energy future.

Our battery energy storage solutions are designed, developed, and manufactured in Finland. From inverters to control and protection systems, everything is crafted locally to ensure high ...

Wärtsilä; Energy Storage is driving the transition to a 100% renewable energy future. We combine time-tested technology with deep grid expertise, ...

Wärtsilä; Energy Storage is driving the transition to a 100% renewable energy future. We combine time-tested technology with deep grid expertise, helping customers and the energy sector ...

From advanced storage solutions to nuclear innovation, learn how technological breakthroughs are paving the way for a more flexible, ...

We develop battery modules, racks and energy storage systems designed to power industrial applications across challenging sectors, including construction, maritime, defence, and grid ...

We design and produce innovative electrical engineering solutions such as energy storages and power quality solutions, and services for the needs of renewable energy and ...
