What is a glass-glass solar system?

The system's glass-glass modules are made with 3.2 mm solar glass and claim up to 95% bifaciality with an operating temperature range of -40 C to 85 C. The company's first green roof pilot was installed at an Oslo school.

Who installed a 5 kW solar system in Oslo?

The installations were installed by Solenergi Fusen, an 11-year-old Norwegian project company specializing in commercial rooftop and building-integrated PV. The projects follow an earlier 5 kW pilot project, also located in Oslo. Over Easy has a novel, low-height, all-in-one system design for flat rooftops.

Where can I find architectural glass?

Contact your Architectural Rep. Find Yours Vitro Architectural Glass (formerly PPG Glass), North America's largest glass producer.

Light comes in from 2 directions making the glass so transparent that it looks like people are living in an aquarium. The building was awarded as Oslos ...
