Are solar panels paired with a home battery energy storage system?

By Sam Wigness | Dec 4, 2025 In the last year, nearly two-thirds of solar.com customers paired their solar panels with a home battery energy storage system (aka BESS). Why?

What is solar battery storage?

Similar to that used in electric vehicles and laptops, lithium-ion battery storage is the most common solar battery cell technology installed today. Within the range of lithium-ion batteries, there are several different chemistries on the market.

What type of battery does a solar system use?

When looking at residential and commercial energy systems, most solar installations utilize electrochemical storage batteries for backup power, with either lithium-ion or lead-acid chemistry. Similar to that used in electric vehicles and laptops, lithium-ion battery storage is the most common solar battery cell technology installed today.

Can solar power be stored in a battery?

Existing solar systems typically have solar inverters, which change the DC power produced by panels to AC power that can be consumed in your home or exported onto the grid. But if you want to store that AC power in a battery, it needs to be inverted again to DC power.

We rank the best solar batteries of 2026 and explore some things to consider when adding battery storage to a solar system.
