What is an uninterruptible power supply (UPS battery backup)?

An Uninterruptible Power Supply (aka a UPS Battery Backup) protects vital connected equipment -- computers, servers, and telecommunications equipment -- from power outages. During an outage, that small UPS Battery Backup under your desk at work gives you enough time to save your spreadsheet and properly shut down your computer.

What is a UPS battery backup?

A UPS battery backup is akin to an emergency power generator for your electronic devices. It not only provides immediate power during an outage but also protects against voltage surges and spikes.

Do you need a reliable UPS battery backup?

In today's digital age, a reliable UPS (Uninterruptible Power Supply) battery backup is not just a luxury--it's a necessity. Imagine you're in the middle of an important project, or worse, a competitive online game, and suddenly, the power goes out. The frustration, the lost progress...it's a nightmare scenario for many.

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience--it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

Our pick for the best UPS overall goes to the APC BR1500G Backup Battery. At 1500VA/865W, it can power most devices, including computers, external hard drives, and ...
