Discover how Sierra Leone's RESPITE project, backed by the World Bank, is installing 28 solar power mini-grids to replace diesel ...

In addition to providing energy access, the project is set to stimulate private sector investment through a public-private partnership (PPP) model, boosting Sierra Leone's ...

Like many nations, Sierra Leone faces an increasing energy challenge. Only 36 per cent of the population has access to electricity, and just six per cent in rural areas. This limited access ...

Discover how Sierra Leone's RESPITE project, backed by the World Bank, is installing 28 solar power mini-grids to replace diesel generators and bring clean, reliable ...

Technological advancements are dramatically improving solar storage container performance while reducing costs. Next-generation thermal management systems maintain optimal ...

Since 2017, Systems Sunlight has been engaged in strengthening energy infrastructure through Sierra Leone's Rural Renewable Energy Project, aiming to improve essential services for over ...

Like many nations, Sierra Leone faces an increasing energy challenge. Only 36 per cent of the population has access to electricity, and just six per ...

With 67kW of solar capacity and 204kWh of battery storage, the project will supply clean, dependable electricity to 54% of Kassiré's households, businesses, and public institutions.
