With over two decades of hands-on experience, we guide clients through every stage of building and operating a successful solar factory in Armenia and around the world.

There are two main types of solar energy technologies--photovoltaics (PV) and concentrating solar-thermal power (CSP). On this page you'll find resources to learn what ...

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar ...

Masrik Solar Farm is currently under development having reached financial close in July 2020. The construction is programmed to take place in 2021-2022 with first operations expected by ...

The Project results are apparent: as of 1 July 2019, 1145 autonomous energy producers are connected to the Energy Network of Armenia, with about 17 MW capacity. 88 with 2.43 MW ...

Renewables developer FRV has completed a 62 MW solar plant in Masrik, Gegharkunik province, Armenia. Madrid-based FRV, which is part of Saudi Arabia's Jameel ...

Tesla solar makes it easy to produce clean, renewable energy for your home and to take control of your energy use. Learn more about solar.

If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax ...

Renewables developer FRV has completed a 62 MW solar plant in Masrik, Gegharkunik province, Armenia. Madrid-based FRV, ...

The Masrik-1 Solar Plant, Armenia's largest solar project, became operational in 2022, adding 55 MW of capacity to the national grid. Similar projects, such as Ayg-1 and Ayg ...

Armenia and the UAE have agreed to begin the construction of the industrial-scale photovoltaic solar power plant "Ayg-1" in Armenia in early 2026.

The successful experience of our company is manifested in the smooth operation of the small, medium, and large solar panels installed in ...

Solar energy is radiation from the Sun that is capable of producing heat, causing chemical reactions, or generating electricity. The total amount of solar energy incident on ...

People have used the sun's rays (solar radiation) for thousands of years for warmth and to dry meat, fruit, and grains. Over time, people developed technologies to collect solar energy for ...

With over two decades of hands-on experience, we guide clients through every stage of building and operating a successful solar ...

The successful experience of our company is manifested in the smooth operation of the small, medium, and large solar panels installed in different parts of Armenia.
