How much does a solar system cost in Canada?

The average cost of a residential solar panel system in Canada is around \$2.50 to \$3.50 per watt before incentives. This means that for a 10 kW system, homeowners can expect to pay between \$25,000 and \$35,000 before any rebates or tax credits.

How much does a 5kW Solar System cost in Canada?

Alberta: A 5kW system in Alberta ranges between \$17,500 - \$23,500 (\$2.51 - \$2.77 per watt). Quebec: The cost in Quebec ranges between \$2,60 and \$3,27 per watt, meaning a 5kW system might run you between \$18,000 and \$26,000 before incentives. As you can see, solar panels for home cost in Canada varies widely, province by province.

How much does solar cost in BC?

British Columbia - Solar installations in BC cost around \$2.60 to \$3.27 per watt, with costs influenced by higher labour expenses but offset by provincial rebates and net metering programs.

How much energy does a solar system produce in Ontario?

Every kilowatt-hour your panels produce is one you don't have to buy from the grid at the highest rates. An average solar system in Ontario (around 7 kW) can produce about 8,000 kWh per year. At an average rate of \$0.13/kWh, that's over \$1,000 in energy savings in the first year alone.
