In a space-constrained environment, this innovative dual-use design enables robust solar generation without sacrificing land for terminal operations. The system was ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

Reliability: Kits are often backed by warranties, providing peace of mind and support in case of any technical issues. Proper mounting and clamping systems are essential to ensure the ...

Go big with our modular design for easy additional solar power capacity. Customize your container according to various configurations, power outputs, and storage capacity according to ...

Over a ten year period, PNCT converted all terminal lighting to LED fixtures and installed hybrid straddle carriers, energy-efficient electric cranes, and ...

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the completion of one of the largest solar power ...

Most PV panels have a warrantee of 25 years or more, making them a good long-term investment and fit for container terminals, which typically feature leases of 25 years or longer.

Made in partnership with the Port Authority of New York and New Jersey and the city of Newark, the system was built over active truck ...
