-----  
How will Trump's tariffs affect the cost of going solar?

Let's start with the impact on the cost of going solar. On March 4, the Trump Administration increased the existing tariffs on China by 10%, which includes solar panels and solar panel components.

Are solar tariffs inflationary?

The bottom line is that tariffs are inflationary. While solar panel prices may rise from the latest round of tariffs, the larger impact will likely be seen in your electricity bill. Related: Trump and the Fate of the 30% Solar Tax Credit There are two industry-specific trade cases working their way through the review process.

Did Trump increase tariffs on Chinese solar panels?

On March 4, the Trump Administration increased the existing tariffs on China by 10%, which includes solar panels and solar panel components. Tariffs on Chinese-made solar components are nothing new and, in fact, were imposed during Trump's first term and expanded by the Biden Administration in 2024.

Do solar panels have a tariff?

In 2014, tariffs were expanded to solar panels assembled using Chinese or Taiwanese cells regardless of country of origin (U.S. ITA 2014, 2015). In 2018, a 30% tariff was imposed on all major solar product exporters to the U.S. (U.S. President 2018; U.S. Trade Representative 2019). This tariff declined 5% each year to reach 15% by 2021.
